Economic Overview And Outlook: New Jersey

JOBS

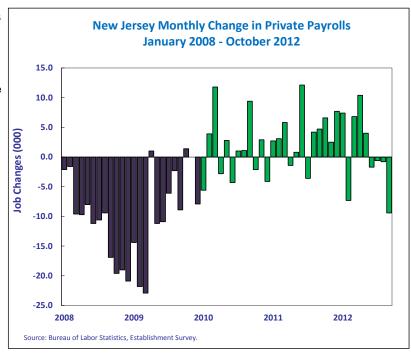

- Including October, the private sector has gained jobs nationwide for 32 consecutive months.
- In New Jersey, private sector employment fell by 7.2 percent from January 2008 to February 2010. Since February 2010, private sector employment has grown by 2.3 percent.
- In New Jersey, employees in the construction, manufacturing, and mining sectors faced the largest job losses (as a percent of employment within an industry) over the recession. Since the beginning of 2010, the following sectors in New Jersey have experienced the greatest employment increases: other services; professional and business services; and education and health services.*
- As the economy continues its emergence from the Great Recession, service-providing industries are projected to add the most jobs between 2010 and 2020. The largest gains over this period are expected to occur in the healthcare and social assistance, professional and business services, and retail trade sectors. Job gains in the goods-producing sector of the economy will be led by the construction and mining industries while the number of manufacturing jobs is expected to fall.

EMPLOYMENT

- The unemployment rate in New Jersey was 9.7 percent in October 2012, up 5.1 percentage points from December 2007, but down from its most recent peak of 9.9 percent in August 2012.
- 447,000 residents were counted among the unemployed in New Jersey during October 2012.
- In New Jersey, initial claims for unemployment insurance benefits totaled 41,262 during October, down 13.9 percent from the previous month. Since peaking at 75,943 in February 2009, initial claims for unemployment insurance benefits have declined by 45.7 percent.

EARNINGS

Between the start of the recession in the 4th quarter of 2007 and the 3rd quarter of 2009, inflation-adjusted total personal income in the United States declined 4.6 percent. Most recently, in the 2nd quarter of 2012, total personal income is 1.9 percent above its 4th quarter of 2007 level.

Real per capita personal income (in 2005 \$) in New Jersey was \$46,595.50 in the 2nd quarter of 2012, up from \$45,592.40 in the 2nd quarter of 2010.

Housing

- After peaking in the first quarter of 2007, national home prices have declined by 17.5 percent.
- In New Jersey, home prices have fallen by 20.7 percent over 21 quarters from their peak in the first quarter of 2007.
- As of the 3rd quarter of 2012, 8.9 percent of all mortgages, including 27.3 percent of subprime mortgages, were in foreclosure in New Jersey.
- Housing starts in New Jersey totaled 16,430 units (seasonally adjusted annual rate) in September 2012, an increase of 20.9 percent from August.
- Within the Northeast census region, which includes New Jersey, sales of new single-family homes totaled 35,000 units in September 2012, an increase of 16.7 percent from August. Sales of existing single-family homes decreased 2.1 percent to 470,000 units (at seasonally adjusted annual rates) from September to October 2012.

How Does New Jersey Compare To Other States?

Workers across the country were hard hit during the Great Recession. Although labor markets in many states have started recovering, employment in most states still remains below pre-recession levels. The chart below allows you to compare New Jersey to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within New Jersey since the start of the recession (shown along the vertical axis) measures the toll the recession took on the job supply in New Jersey.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant are experiencing lower unemployment rates and smaller job losses than the national average.
